

The wrapping and Christmas papers of the JUNG Design collection (stock range) are produced climate neutrally. We offset the CO<sub>2</sub> emissions generated during production via the renowned **NatureOffice** organisation. There are no additional costs for our customers for this.

You can find more information about Natureoffice at **www.natureoffice.com**.

In the case of bespoke productions, our customers can decide whether they want to offset the CO<sub>2</sub> emissions generated by their printing project. Your sales consultant will be happy to provide you with more information.

In consultation with NatureOffice and after careful consideration, we have decided on the compensation project „**Project Togo - Climate Protection in Togo/West Africa**“. Behind this project is NatureOffice’s vision to combine climate protection with the improvement of social structures. It is about much more than „just“ reforestation. NatureOffice’s focus is on water, health, education, energy and jobs.

More information on „Project Togo“ can be found at:

## TOGETHER it's climate protection

*Our carbon offset project is much more than environmental protection!  
It's protection of humans.*
