

# Information on Data Submission

## Tissue Paper and Gift Wrapping Paper – DIGITAL PRINTING

# JUNG

BEAUTIFUL PACKAGING

The print quality of your tissue paper or gift wrap can only be as good as the data you provide. To ensure error-free and optimal processing of your artwork, we have compiled useful tips for preparing your print files.

### DATA SUBMISSION

Please send us your print files via e-mail or via online services such as [WeTransfer](#) or [Dropbox](#).

If you have any questions, we are available personally during our business hours: Monday–Friday, 8:00–12:00 and 13:00–17:00

If you have any questions, please contact your personal salesperson.

02/2026

## IMPORTANT INFORMATION

### Resolution

To ensure good print quality, the resolution of your data must be set to **300 dpi**.

### CMYK

There are various color systems and color spaces that can be used for data creation. We print in **CMYK**. Please prepare your files accordingly. We cannot process RGB data. Colors must therefore be converted to CMYK or specified as Pantone colors.

### File Format

- PDF
- **CMYK with color profile**
  - ISO coated (Fogra 39)
  - or ISO uncoated V2 (Fogra 29)
  - or PSO coated V3 (Fogra 51)
  - or PSO uncoated V3 (Fogra 52)
- **Color specifications for motifs**
  - Pantone (e.g. 531 C for coated, 531 U for uncoated)
  - CMYK (e.g. 3-13-0-9)
- Image resolution = 300 DPI at original size 100%
- Fonts always as vectors / outlines
- Logos preferably as vectors / outlines

### Fonts

Fonts must always be converted to vectors/outlines. Font sizes below **7 pt**, as well as light/thin font styles below **9 pt**, cannot be reproduced optimally in print. Please avoid critical font sizes and weights, and never set black text as four-color black to prevent possible blurring.

### Line Thickness

Lines must be created with a minimum thickness of 0.25 pt (0.09 mm). Lines thinner than 0.25 pt may not be reproduced optimally in print.

### Layout templates

On our website [www.jung-design.de/Data\\_submission](http://www.jung-design.de/Data_submission) you will find downloadable layout templates for all sheet and roll formats, which you can upload into your design software.

### Design Service

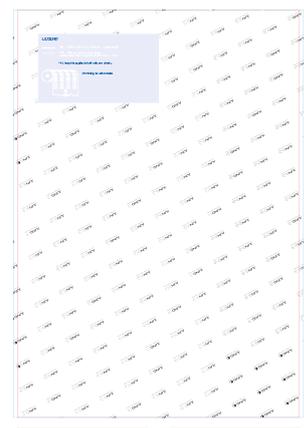

If you are unable to create usable print data yourself, we will be happy to do this for you for a fee based on the required effort. More information: [www.jung-design.de/Data\\_submission](http://www.jung-design.de/Data_submission)

Please provide **one separate PDF file per print design/motif; do not combine multiple different designs in a single PDF**, as this would require additional processing on our side to split and separate the file.

We are happy to produce an original proof for approval prior to production. Original proofs are produced on the production machine and are charged at €500 per print image. You will receive approximately 10 m of the tissue paper or gift wrapping paper for approval. The production of the approved material will then be carried out based on your approval.

Sample image layout template – sheets 50 x 70 cm

Sample image layout template – rolls 70 cm x 200 m
